Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "reflector housing" and the "U-shaped opening" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Yu et al. [US 2004/0012763 A1].

Regarding claim 1, Yu et al. discloses a clamp for holding a lamp within a reflector housing comprising: a body [140] having at least one semi-cylindrical recess [142] with at least one opening for accepting a cylindrical lamp [130] (figures 3-5).

Regarding claim 2, Yu et al. discloses the semi-cylindrical recess is sized to be in close proximity to the circumference of the lamp (figures 3-5).

Regarding claim 3, Yu et al. discloses the body has an exterior and the exterior is sized to be in close proximity to the interior of a reflector (figure 3).

Regarding claim 4, Yu et al. discloses at least two semi-cylindrical recesses (figure 5G).

Regarding claims 5 and 6, Yu et al. discloses the body is formed of a resilient, elastomeric material; the resilient, elastomeric material is selected from silicone, polyester, polyurethane, polyethylene, neoprene, and butyl rubber (paragraph 0024).

Regarding claim 7, Yu et al. discloses a cylindrical lamp is pressed into the opening of the semi-cylindrical recess forming an assembly (figures 3-4).

Regarding claim 8, Yu et al. discloses the assembly is pressed into a U-shaped opening of a reflector housing (figure 4).

Regarding claim 9, Yu et al. discloses press-fitted into a U-shaped opening of a reflector housing (figures 3-5).

Regarding claim 10, Yu et al. discloses at least one lamp and a reflector housing (figure 3).
